

Fábio Rodrigues

Lead Software Engineer | Java 21 & Spring Boot 3 | AI-Assisted Engineering (Google Antigravity)

Recife, PE — Brazil (Remote) | fabioandre777@gmail.com | +55 (81) 98992-0040 | [linkedin.com/in/fabiorodrigues-dev](https://www.linkedin.com/in/fabiorodrigues-dev)

PROFESSIONAL SUMMARY

Results-driven Software Engineer with a solid background in **Design & Cognitive Ergonomics (UniFBV)** and deep expertise in **Java 21 LTS, Spring Boot 3.3+**, and **Clean Architecture**. Specialized in architecting resilient RESTful microservices, implementing strict **TDD (JUnit 5 / Mockito)**, and leveraging next-generation **AI-assisted engineering workflows (Google Antigravity, Spring AI MCP, Vapi Voice AI)**. Proven experience driving predictable Agile/Scrum delivery, mentoring peers, and designing autonomous AI-driven integrations. Committed to extreme ownership, high code quality, and continuous delivery for global enterprise clients.

TECHNICAL COMPETENCIES

- **Languages & Core:** Java 21 LTS (Records, Pattern Matching, Sealed Classes, Streams, Concurrency), TypeScript, JavaScript, Swift, SQL, Python.
- **Backend & Frameworks:** Spring Boot 3.3+, Spring Data JPA, Spring Web (REST APIs), Spring AI (MCP Server), Hibernate ORM, Bean Validation, Node.js.
- **Architecture & Quality:** Clean Architecture, Hexagonal Architecture (Ports & Adapters), SOLID Principles, RFC 7807 (ProblemDetails), TDD, BDD, JUnit 5, Mockito, AssertJ.
- **AI-Enthusiastic Workflow & Agents:** Google Antigravity, Spring AI (Model Context Protocol - MCP), OpenAI GPT-4o-Mini, Gemini API, Vapi (Voice AI), RAG, Asynchronous Webhooks.
- **Distributed Systems & Data:** Microservices Architecture, H2 Database (File-based ACID Persistence), PostgreSQL, MySQL, RESTful API Design.
- **Agile & Delivery:** Scrum / Kanban, Sprint Planning, Daily Stand-ups, Sprint Reviews, Retrospectives, Jira, Time-blocking, CI/CD Scripting.
- **Design & Product:** UX/UI Design, Human-Centered Design, Cognitive Ergonomics, Information Architecture, Design Systems.

PROFESSIONAL EXPERIENCE

Infinitt Tecnologia | Operations Support & Solutions Engineer

April 2026 – Present | Recife, Brazil

- Drive operational automation and technical solution delivery for commercial printing and visual communication B2B workflows.
- Architected and deployed **Sofia (Voice AI Outbound Agent)**, integrating Vapi, LLMs, and WhatsApp API webhooks for automated lead qualification.
- Streamlined operational communication pipelines by engineering custom RESTful API integrations for seamless commercial hand-offs.

Unigames | Systems Development & Software Consultant

July 2025 – December 2025 | Recife, Brazil

- Provided technical consulting and backend software engineering, optimizing relational database schemas and API response times.
- Refactored legacy business logic into modular, decoupled services, increasing test coverage and reducing delivery friction.

Wolf Agency | Partner & Head of Technology & Design

January 2025 – June 2025 | Recife, Brazil

- Directed engineering and design initiatives, aligning technical execution with client business goals through Agile/Scrum sprints.
- Established architectural standards, code review practices, and design systems for interactive web applications.

Qyon Multinacional | ERP Operations & Process Management Specialist

January 2022 – May 2024 | Recife, Brazil

- Managed enterprise ERP systems, diagnosing and resolving complex data flow inconsistencies across fiscal, accounting, and payroll modules.
- Collaborated with cross-functional teams to parametrize enterprise resource planning modules and enforce data integrity.

FEATURED ENGINEERING PROJECTS

NOVA — Multi-Agent Ecosystem & Financial Microservice (Java 21 + Spring Boot 3)

Software Architect & Lead Developer

- **Decoupled Clean Architecture:** Engineered a modular Spring Boot microservice strictly adhering to Clean Architecture (Domain, Application, Infrastructure), isolating business logic from external frameworks.
- **Native Spring AI MCP Server:** Implemented Model Context Protocol tools (@Tool), enabling AI agents to autonomously execute transactional logic and analytical budget calculations.
- **ACID File-Based Persistence:** Configured embedded H2 database in file mode (financiadb.mv.db), guaranteeing transactional consistency and zero data volatility across restarts.
- **TDD & Automation:** Built comprehensive test suites using **JUnit 5 + Mockito** and created a custom Python CLI tool for automated Clean Architecture scaffolding.

Sofia — Autonomous Voice AI Outbound Agent (Infinit Tecnologia)

AI Integration Engineer

- **Real-Time B2B Voice Automation:** Built an autonomous outbound voice agent on Vapi with low-latency speech processing, OpenAI GPT-4o-Mini, and RAG knowledge retrieval.
- **Integration Layer:** Connected real-time call telemetry to asynchronous webhooks and WhatsApp APIs for instantaneous post-call messaging.

Aetheris — Native iOS Mobile Application (Swift / SwiftUI)

Mobile Developer & UI Designer

- **Productivity Gamification:** Native iOS app utilizing cognitive ergonomics and Apple Design Systems to foster consistent habits and focus blocks.

EDUCATION & CERTIFICATIONS

- **Faculdade Boa Viagem (UniFBV) | Bachelor's Degree in Design (UX/UI & Cognitive Ergonomics)** (4-Year College Degree)
- **Bootcamp Santander 2026 — AI Java Back-end | Digital Innovation One (DIO)**
- Advanced practical specialization in Java 21 LTS, Spring Boot 3, Microservices, Clean Architecture, and Spring AI.
- **Bootcamp Itaú — Java with Artificial Intelligence | Digital Innovation One (DIO / Itaú)**
- Advanced backend engineering in Java, microservices, and AI system integration.
- **Decola Tech 2025 — Full Stack Developer | Digital Innovation One (DIO / Avanade)**
- Full stack engineering covering system architecture, modern web development, and RESTful APIs.
